

great product

The Hot Air Balloon Retrospective

Sunny Skies

What positive things are ahead of us?

great mvp

Product delivery

Upcoming features for Syncycle

app goes live finally

a live app that people can use and log data in

great design and marketing

first users

beta users can test and provide feedback

demo day / hackathon

almost everyone does their part

people show up more often

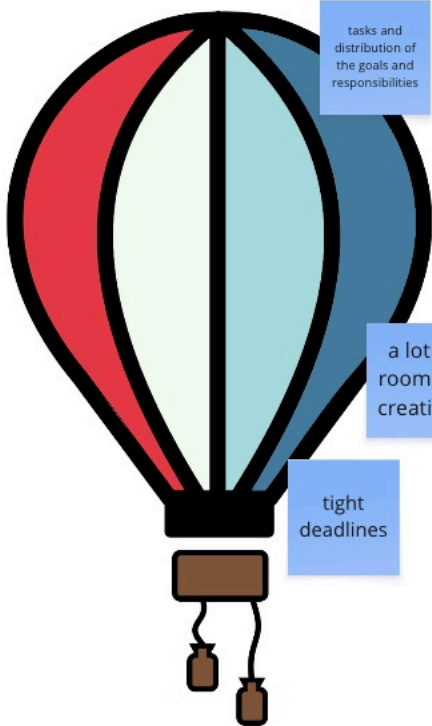

better group dynamic

our way of organising things keeps getting better and better

Delivering the product and addition of features a better group group dynamic first user onboarding Demo day

Hot Air

What are the things pushing us along?

tasks and distribution of the goals and responsibilities

Sticky stack

deadlines

Well defined sprint goals

a lot of room for creativity

continue to be a real startup

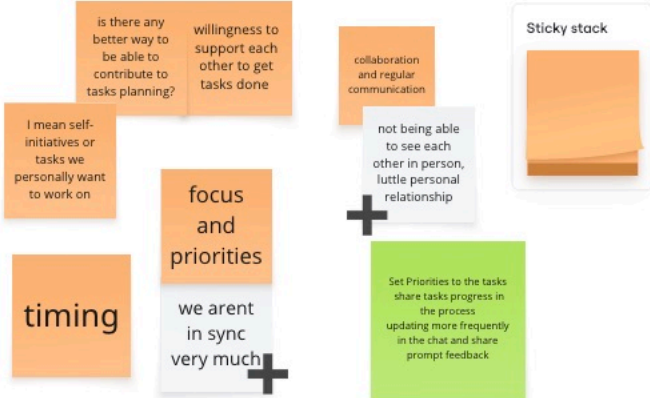

tight deadlines

A clear product vision

Sticky stack

Sandbags

What is slowing us down or holding us back?

Storm Clouds

What problems or obstacles are coming up?

little time for a lot of tasks

defining the prio 1 things and focusing only on those

unclear product direction

lots of market compeditors

Hackathon Planning - Tuesday

the test

worried about not being good enough in time for the hackathon

not knowing what will happen after hackathon

github/ contributions/ grading??

my laptop is slowing down 🐢, need to push the code immediately before something happens this sprint
