

Syncycle

Sprint Review

Lean Canvas Model

PROBLEMS

- ❖ Reduced quality of life
- ❖ Lack of control & clarity
- ❖ Hormonal unpredictability
- ❖ Low energy affects fitness & nutrition

SOLUTION

- ❖ A data driven web application that guides you through your cycle and predicts upcoming changes

CUSTOMER SEGMENTS

- ❖ Individuals who menstruate, with internet access, English speaking, 18 – 50 years old, digital natives
- ❖ TAM: 380 – 390M
TAM (Revenue): €19.5B
- ❖ SAM: 7 – 8M
SAM (Revenue): €400 – 500M
- ❖ TOM: 40 – 50K users
TOM (Revenue): €2 – 9M
attainable APR

We address a €20B+ global market, starting with Germany as our initial serviceable market before expanding internationally.

KEY METRICS

- ❖ Acquisition – social media, referral, free testing
- ❖ Activation – free testing, referral bonuses
- ❖ Retention & referrals

UNFAIR ADVANTAGE

- ❖ Deep founder-user proximity
- ❖ Strong behavioral data insight

UNIQUE VALUE PROPOSITION

- ❖ Clarity for your cycle
- ❖ Comfort in your life

COST STRUCTURE

- ❖ Cloud infrastructure, SE, Tokens
- ❖ Engineering team
- ❖ Marketing spend
- ❖ Others

REVENUE STREAMS

- ❖ Marketing ads
- ❖ CLV
at € 5/month: €180 for 3 years
at €10/month: €360 for 3 years
- ❖ Subscription (EUR)/month X No. of Users

40k users at €5 - 10/month: €200k - 400k

150k users at €5 - 10/month: €750k - 1,500k

CHANNELS

- ❖ TikTok & Instagram
- ❖ Influencer partnerships
- ❖ Community Building, networking and mingle, events (eg. office girls)
- ❖ SEO & Google Ads

Promotional

Website

Delivered a functional MVP landing page increment,

implementing the core website structure (Hero, Mission, How It Works, Team, Blog, Footer) to clearly communicate Syncycle's product vision and user value.

Defined and implemented MVP feature communication,

presenting the three core product capabilities within the "How It Works" section to support hypothesis testing and upcoming user feedback collection.

Modus Operandi

Team Tools

- Notion Workspace — General workflow management and documentation
- GitHub — Code repository and Kanban board for product development
- Miro Board — Collaborative brainstorming and visual planning
- Slack Channel — Communication and updates with the professor
- WhatsApp Group — Quick coordination, discussion, and collaboration
- Google Meet — Team meetings and presentations

Development

Platforms

- Website: Lovable
- Web App Development: VS Code with Claude (more in next sprint)
- Hosting: Vercel

Customer Stories

“

Customer 1

"I'm currently using My Calendar Period to track my cycle, but it doesn't really improve my quality of life. Syncycle would be the right solution for me."

”

“

Customer 2

"I'm currently using Flo, but it's a bit expensive. A price below €5 would definitely make Syncycle the better choice for me."

”

“

Customer 3:

"I don't currently use a cycle tracking app, but I really love your idea and would be excited to be part of the journey."

”

Leap of Faith

assumption

1. Women prioritize cyclical optimization enough to adjust how they train, work, and plan their lives.
2. Women will adopt a dedicated tool to support cycle-based optimization.
3. Women who track their cycle actively want productivity insights based on their current phase.
4. Women will use cycle-based insights to plan their work week.
5. Women are willing to pay for a high-quality cycle-based tool.
6. Women want to use such an app daily because of engaging features.
7. Women seek a daily companion that supports them emotionally throughout their cycle.
8. Women want a tool that genuinely helps them understand their bodies better.
9. Women trust an app enough to log personal health patterns and intimate data.
10. Women believe the menstrual cycle affects their physical, mental, and emotional wellbeing.
11. Women are motivated to use an app that helps them manage goals based on predictive and personalized insights.

Top 3 assumptions:

1. Women are willing to pay for a dedicated cycle-based optimization tool.

This is critical because the business model depends on it. Engagement without monetization is insufficient.

2. Women want daily guidance and would use the app every day.

Daily use is essential for retention, habit-building, and long-term value. If daily engagement doesn't happen, the product loses relevance quickly.

3. Women trust the product enough to log intimate, personal health data.

Without trust, no meaningful personalisation or predictive insights are possible — making the core value proposition impossible.

Sprint 2 Ideas - 28 Feb - 6 March, 2026

Finalize Tech Stack and begin Development

- Scientific Backing and Advisory Positioning
- Move from User Stories to User Persona
- Domain and Brand Consolidation
- Social Media Activation
- Blog and Website Refinement
