

# Competitor Landscape - Market Gaps

## Competitor Landscape

| Brand                 | Type                                                 | Positioning                     | Core Use Case               | Tracking Scope                            | Tracking Depth       | Prediction Type                      | Insights & Analytics  | Content / Education          | Community / Social |
|-----------------------|------------------------------------------------------|---------------------------------|-----------------------------|-------------------------------------------|----------------------|--------------------------------------|-----------------------|------------------------------|--------------------|
| <u>Clue</u>           | General Cycle Tracking (Mass / Data-first)           | Science-based, health tool      | Track cycle + and patterns  | 200+ data points (e.g., pain, mood, etc.) | Very high            | Statistical modeling (cycle history) | Strong (charts, data) | Curated content              | Mostly no          |
| <u>Flo</u>            | General Cycle Tracking (Mass / Data-first)           | All-in-one health platform      | Track + consume + community | ~70+ symptoms + lifestyle                 | High                 | AI-driven predictions (black-box)    | Simplified insights   | Extensive (forums, articles) | Forums & articles  |
| <u>Glow</u>           | General Cycle Tracking (Mass / Data-first)           | Data-heavy community            | Conception + cycle tracking | Fertility + symptoms + lifestyle          | High                 | Fertility-focused predictions        | Strong but limited    | Minimal                      | Forums & articles  |
| <u>Natural Cycles</u> | Fertility & Contraception (Medical / Outcome-driven) | Regulated digital contraception | Prevent or plan pregnancy   | Temperature + cycle dates                 | Low                  | BBT + algorithm (regulated)          | Minimal or none       | Minimal                      | Mostly no          |
| <u>Ovia</u>           | Fertility & Contraception (Medical / Outcome-driven) | Fertility + pregnancy journey   | Conception → cycle tracking | Fertility health                          | High                 | Fertility prediction                 | Minimal or none       | Strong (journaling)          | Mostly no          |
| <u>Kindara</u>        | Fertility & Contraception (Medical / Outcome-driven) | Fertility awareness             | Manual fertility tracking   | Basal body temp,                          | Deep but specialized | User interpretation (no              | Minimal or none       | Minimal                      | Mostly no          |

| Brand                                    | Type                      | Positioning                        | Core Use Case                      | Tracking Scope                    | Tracking Depth | Prediction Type                        | Insights & Analytics | Content / Education | Community / Social |
|------------------------------------------|---------------------------|------------------------------------|------------------------------------|-----------------------------------|----------------|----------------------------------------|----------------------|---------------------|--------------------|
|                                          |                           | method (FAM)                       |                                    | cervical fluid                    |                | automation focus)                      |                      |                     |                    |
| <u>Read Your Body</u>                    | Fertility & Contraception | DIY body literacy tool             | Interpret fertility signals        | Fully customizable tracking       | Very high      | No prediction (manual user-led)        | Minimal or None      | Minimal             | Mostly no          |
| <u>Stardust</u>                          | Cycle Syncing             | Privacy-first + "spiritual" angle  | Track cycle with emotional framing | Basic cycle + mood                | Low-medium     | Simplified predictions                 | Minimal or None      | Minimal             | Mostly no          |
| <u>28 (by Evie)</u>                      | Cycle Syncing             | Cycle syncing with lifestyle       | Align habits with cycle phases     | Minimal tracking                  | Low            |                                        | Minimal or None      | Minimal             | Mostly no          |
| <u>Wild AI</u>                           | Cycle Syncing             | Performance optimization for women | Training + cycle alignment         | Cycle + training recovery metrics | Medium         | Training recommendations (cycle-based) | Minimal or None      | Minimal             | Mostly no          |
| <u>Moody Month</u>                       | Cycle Syncing             | Mood-focused tracking              | Emotional awareness                | Mood + cycle                      | Medium         |                                        | Minimal or None      | Minimal             | Mostly no          |
| <u>Hormone Horoscope (astro + cycle)</u> | Niche / Emerging Angles   | Entertainment + astrology          | Cycle + horoscope blend            |                                   |                |                                        | Minimal or None      | Minimal             | Mostly no          |
| <u>Belle (mental health + cycle)</u>     | Niche / Emerging Angles   | Mental health + hormones           | Mood + cycle correlation           |                                   |                |                                        | Minimal or None      | Minimal             | Mostly no          |

\*Showing 10 of 11 columns. For all columns, refer to the CSV file included in the export zip.

## ◆ Tracking Depth (What is actually tracked)

👉 Observation:

- There is a **clear split between “broad trackers” and “focused trackers”**
- No app combines **deep tracking + structured interpretation layer** consistently

## ◆ Prediction & Modeling

👉 Observation:

- Prediction is either:
  - **statistical (Clue)**
  - **AI (Flo)**
  - **medical algorithm (Natural Cycles)**
- Very few apps focus on **post-prediction decision support**

## Market Landscape Matrix

Axes:

- **X-axis:** Market Traction (users, growth, expansion)
- **Y-axis:** Differentiation (uniqueness of positioning + features)

## Product Capability Landscape

Axes:

- **X-axis:** Feature Depth (how much + how granular tracking is)
- **Y-axis:** Actionability (does the app tell you what to *do*)

- **High traction apps** → win via **scale or lifecycle expansion**
- **High differentiation apps** → win via **narrow use case**

## ◆ Feature Layer: Beyond Tracking

### ◆ Insights & Analytics

👉 Pattern:

- Insights exist, but are mostly **descriptive not prescriptive**

### ◆ Content / Education

👉 Pattern:

- Content is **not tightly integrated** with user data

### ◆ Community / Social

👉 Pattern:

- Community exists but is **detached from tracking data**

### ◆ Lifestyle / Behavior Integration

👉 Pattern:

- Only a few apps attempt **cycle → behavior mapping**
- Implementation is **shallow or static**

- **But no one dominates on product intelligence (depth + action)**

## **Customization**

👉 Pattern:

- Trade-off:
  - high customization → complexity
  - simplicity → rigidity
