

**“Women are not small men.
Stop training and fueling like one.”**

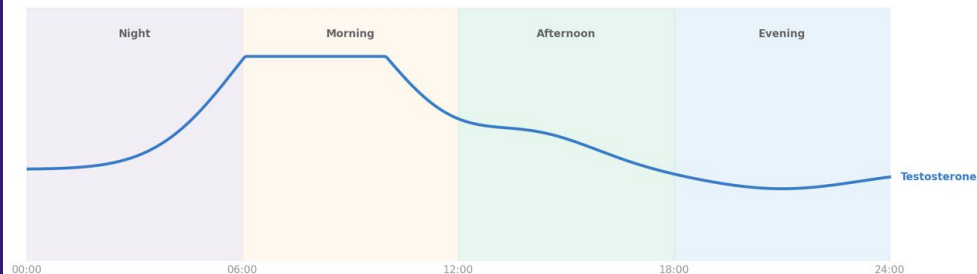

Dr. Stacy Sims, Women's Health Expert, Physiologist, Nutrition
Scientist, Author, Fitness Advocate

THE PROBLEM

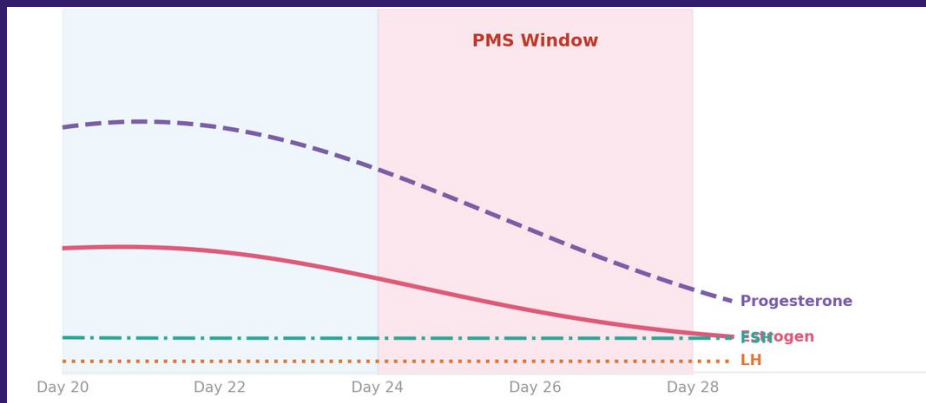

Female Monthly Cycle · ~28 Days

Male Daily Cycle · 24 Hours

Schematic illustration of average hormonal patterns — individual variation applies.

Energy level:

- Low
- Fatigue and brain fog
- Rest is productive

Workout:

- Low intensity
- Avoid overtraining

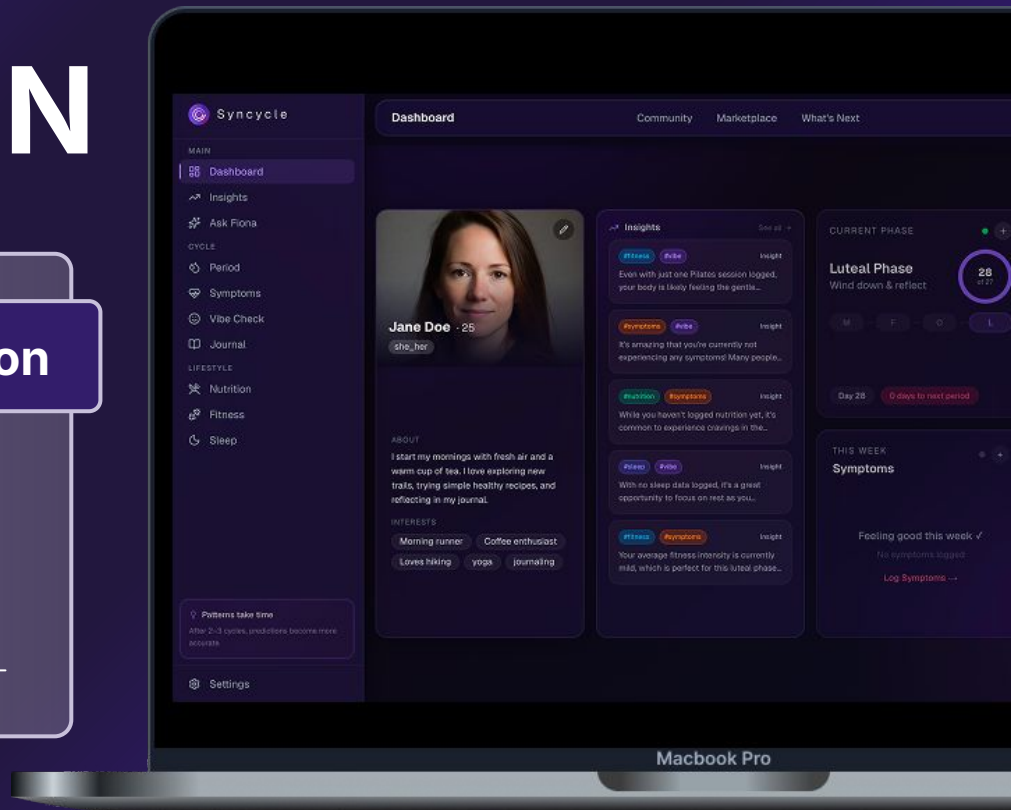

Nutrition:

- Magnesium helps
- Sugar and carb cravings
- High fibre

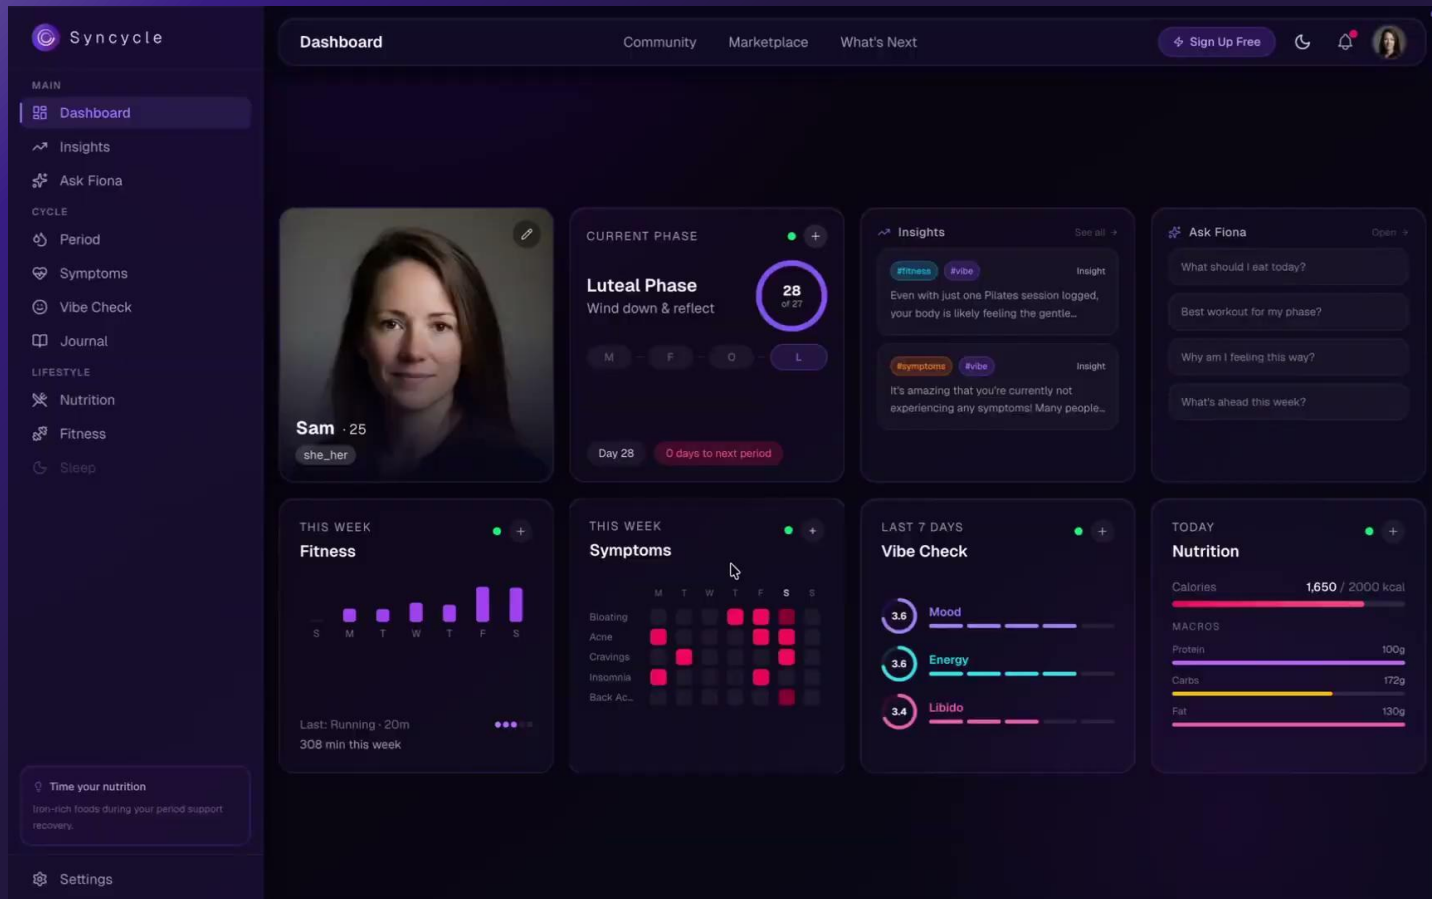

THE SOLUTION

Syncycle - Your AI Cycle Companion

Smart, science-backed cycle insights, predictions and actionable advice - fully personalized, privacy-first, and built on data you control.

HOW IT WORKS

TRACTION & REVENUE POTENTIAL

32

Users joined

Since the launch
this week

1. Subscription Revenue (Core)

Freemium model with €4.99/month premium tier →
scalable, recurring revenue.

2. Influencer-Led Growth Engine

3. Strategic & B2B Partnerships (Future)

OUR TEAM
