

Syncycle

Sprint 5 Review

Progress update on user onboarding, competitor analysis, Marketing & Awareness and product refinement for our AI-powered women's cycle companion

Competitor Gaps & Market Landscape

◆ Tracking Depth

No app combines deep tracking + structured interpretation layer consistently

◆ Prediction & Modeling

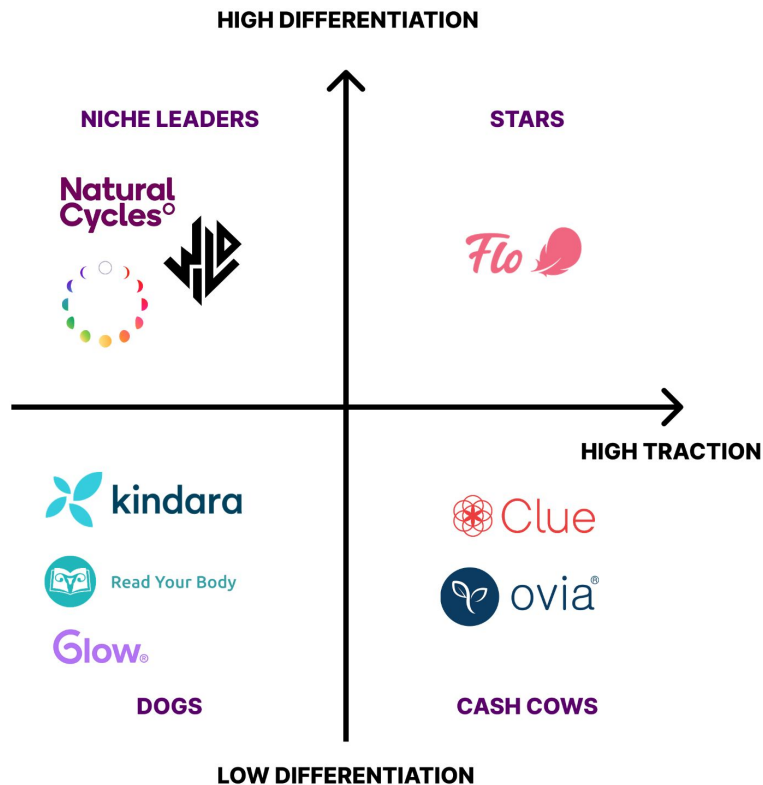

Very few apps focus on post-prediction decision support

◆ Insights & Analytics

Insights exist, but are mostly descriptive, not prescriptive

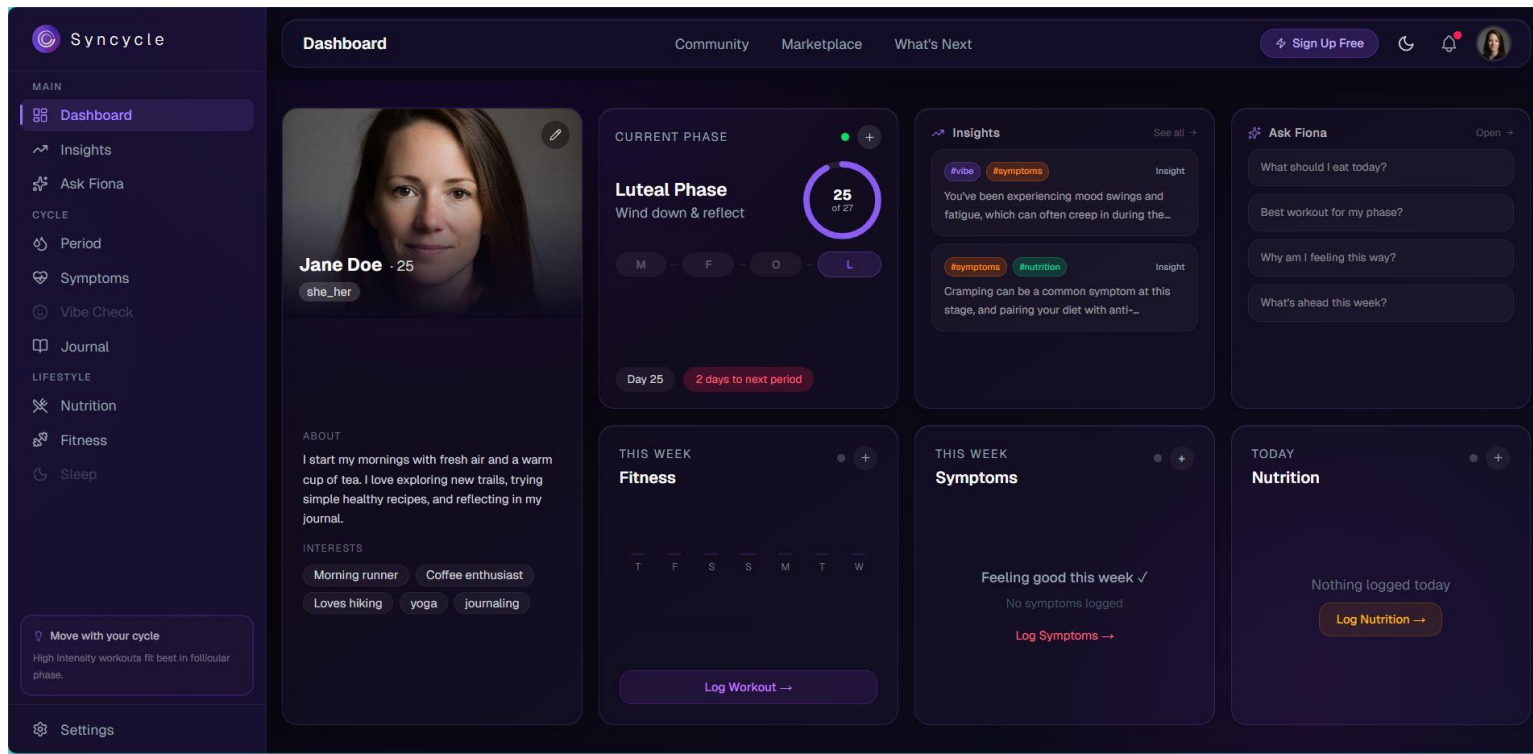

◆ Lifestyle / Behavior Integration

Only a few apps attempt cycle → behavior mapping

Product development & Enhancement

- Theme Toggle: Aurora ↔ Dark Mode
- Sidebar Suggestion Box
- AI Data Access Controls

Hackathon Preparation & Focus

Biggest focus on our USP - Actionable & Holistic Hormonal Insights

App Improvements

Data Privacy (concepts, make data more safe)
Insights section: enhance it and highlight it
Visibility, decluttering

Marketing

KPIs, Content production, Calender, Canva
Templates

Research & Implementation

Research (Scientific) for DB, SEO Strategy

Social Media Strategy & Our First Event

Positioning:

→ *The operating system for women to align life with their cycle.*
(bridging science, performance & real life).

Content Pillars (What we talk about)

- Cycle = Superpower → productivity & energy optimization
- Symptom Solver → pain relief & actionable solutions
- Private by Design → trust & data privacy differentiation
- Train with your Cycle → fitness & performance

Channels & Formats

- Primary: TikTok & IG Reels (short-form video, discovery)
- Secondary: Instagram Carousels (saveable, educational)

Join Early Access

We're inviting our first users to experience Syncycle before the full launch. Early access members help shape the product — and we really appreciate your feedback 🤝
